

# QUANTUM COMPUTING FOR INDUSTRY:

From Fundamentals to Simulation

**12.06.2026**  
10:00 – 17:00

**PTB Berlin**  
Abbestraße 12

As **quantum computing** moves from theory to reality, this full-day workshop equips you with the concepts and practical insights to grasp what quantum simulation means for industrial applications.

### **YOU WILL LEARN:**

- Fundamentals of quantum systems
- Introduction to quantum computing
- A primer on quantum simulation
- Networking – connect with researchers and fellow professionals.

### **IDEAL FOR:**

Industry professionals across Chemistry, Materials Science, and Engineering alongside Innovation Leaders and Software Architects exploring quantum utility.

No prior quantum mechanics background required.

**JOIN** a diverse community of experts and peers to exchange ideas and forge valuable partnerships in a rapidly evolving landscape.
